
identity, radial sweep (exact 0 shown at 10^{-18})
$\xi = 0.5$
$\xi = 0.6$
$\xi = 0.75$
$\xi = 0.85$
$\xi = 1.0$
$\xi = 1.2$
$\xi = 1.5$
$|\theta - \theta_S - \theta_L|/\theta$
r

small-r cancellation in $K - K_S$
naive $\theta - \theta_S$ (cancellation)
θ_L by its own s-quadrature
rel. error of θ_L (50-digit mpmath)
r
